

DOCKING AND CALIBRATION STATION

Gas Detection For Life

SDM-2009

Features

Stand Alone Station

- Stand-alone station (no PC Required)
- Charging
- Calibration
- Bump Test
- Save Bump Test and Calibration records
- Bump test and calibration records copy to USB jump drive
- Includes PC software for viewing/archiving bump test and calibration records

Multi Module System

- Multiple modules connected to a PC (10 max)
- Charging
- Calibration
- Bump Test
- Automatic calibration/bump test option
- Configure GX-2009 parameters
- Archive Bump Test and Calibration records
- Archive data to network location
- Software controlled data retrieval
- Windows 7 compatible

Stand Alone Station

The SDM-2009 is a versatile maintenance tool that automates the service of a GX-2009 portable gas monitor. This docking station can be used as a stand alone device for charging, calibration and bump testing, with all records stored automatically for future upload to a PC via USB flash drive (PC software and flash drive included).

Multi Module System

Automate how you manage and service GX-2009 instruments by connecting the SDM-2009 to a computer with a USB cable. With the SDM Docking Station controller software, you can simultaneously calibrate, bump test, archive data, or charge up to ten instruments. Also, download the datalogging history from each instrument into one easy to manage locator. SDM-2009 stations can be manifolded together to reduce the number of demand flow regulator gas cylinders required.
